

Tayo Omolola

I am a college student working towards a Bachelor's degree in Computer Science at UMGC, with a strong focus on building a career in the field. My goal is to develop a deep understanding of computing principles and technologies to prepare for a future in the industry.

EXPERIENCE

HCPSS, Columbia, MD — *Computer Technician*

August 2023 - PRESENT

- **Diagnosed and repaired hardware issues** on desktops, laptops, and peripherals.
- **Troubleshoot software problems**, including operating system errors, application crashes, and driver conflicts.
- **Replaced and upgraded computer components**, such as RAM, hard drives, SSDs, motherboards, power supplies, and graphics cards.

Starflight Enterprise, Jessup, MD — *Certified Medication Technician*

March 2021 - April 2022

- **Coordinate with healthcare professionals and family members** to ensure comprehensive care of patients under my care.
- **Promote a safe and clean living environment**, ensuring adherence to hygiene and safety protocols.
- **Transport individuals to appointments, social activities, and community events** as needed.

ABS Capital, Baltimore, MD — *Intern*

May 2019 - September 2019

- **Updated and maintained affiliate contact information** in Salesforce and PitchBook to ensure accurate records.
- **Utilized Microsoft Office 365 tools** for daily job activities, including document creation, data analysis, and communication.

ABS Capital, Baltimore, MD — *Intern*

May 2018 - September 2018

- **Updated and maintained affiliate contact information in Salesforce and PitchBook to ensure accurate records.**
- **Identified and resolved discrepancies** in databases, ensuring data integrity.
- **Corrected data entry errors** to prevent duplication and maintain high-quality data

EDUCATION

UMGC, Baltimore, MD — *Computer Science BS*

September 2024 - Present

CCBC, Essex, MD — *Computer Science AS*

December 2021 - June 2024

SKILLS

- Comprehend customer requirements and provide recommendations.
- Strong analytical and problem-solving abilities.
- Backup software - Windows and Linux system backup
- Proficient in installing, configuring, and managing Windows and Linux operating systems.
- Proficient in network configuration via the command line, troubleshooting, and structured cabling.
- Collaborative team player.

AWARDS/CERTIFICATES

[CompTia A+](#) certificate post computer technician skills training at Per Scholas.

[An Introduction to Programming The Internet of Things \(IoT\)](#) - A Coursera specialization from the University of California, Irvine. I learned how to use Python on a Raspberry Pi board and C++ on any Arduino board, the Smart Garden project being my capstone project for this specialization.

PROJECTS

[Small Man of Renown](#) - programming in C# using the UnityHub game development engine to make games.

[Smart Garden](#) - An automated garden irrigation system built using Arduino Uno and Mega boards and Raspberry Pi 4 board. This project has a web application for users to monitor and regulate the irrigation system in real time.
